

VAHAN & SARATHI for Road Transport Department

The Vahan software developed by NIC-HQ is successfully implemented in all 7 RTO locations in Goa in April 2010. This software is primarily designed for Registration of Vehicles

Vahan Software has the following features

- Registration of New Vehicles
- Issuance of Fitness Certificate
- Road Tax Collection
- Transfer of Ownership
- Renewal of Registration
- Conversion of Vehicle
- Alteration of Vehicle
- Permits etc.
- Enforcement

The Sarathi software developed by NIC Hyderabad, has also been successfully implemented in all 7 RTO's in GOA in October 2010. Sarathi is used for providing Learning/Driving Licenses to the public. Sarathi Software has the following features

- Issue of fresh Learner's/Driver's Licence
- Renewal of Learner's/Driver's Licence
- Duplicate Learner's/Driver's Licence
- Change of Name/Address in Driving Licence
- Duplicate Driving Licence
- Enforcement etc.

Goa is the first state in the country to introduce vehicle registration at Dealers' location. NIC Goa has developed a web-based module to facilitate vehicle registration at Dealers' location and seamlessly integrated this module with the Vahan software. Vahan and Sarathi systems have played a crucial role in introducing transparency in a high profile department like the Road Transport Department.
